

Esdra Bergamasco

I'm a **junior front-end web developer** with a passion for user experience and interactive design, and a desire to eventually become a full stack developer. I am looking for a job either remote or in presence to build up experience and upgrade my skills. I'm currently living in Padova, Italy and studying Economics at the university.

WORKS & EXPERIENCE

Portfolio: esdrabergamasco.com

I built from scratch my own website, fully responsive with a focus on micro-interactions. I choose to not use any framework and reserving them for other project. My portfolio aim to show my abilities as a front-end developer but in it you can also find a collection of all my other projects I consider worth showcasing.

Multi Step Form: esdra00.github.io/Multi-Step-Form-React-Ts/

A simple Multi Step Form built with React Typescript, styled with Sass. It features different input types, validation, and a summary of users selection before submission. Formik in combination with Yup handle validation and submission.

Product Feedback Explorer: esdra00.github.io/Explorer-Product-Feedback-React-Ts/

Product feedback application made with React Typescript. Users should be able to create, read, update, and delete product feedback requests. Filters and sort options can help navigate through the suggestions faster. Users can also add comments and replies to a product feedback request.
